Removing barriers to construction through our knowledge of regulations is what we do best. Our licensed professional staff work with commercial clients to identify asbestos-containing materials, manage it during disturbance and demolition, and provide awareness training. LTE worked with stakeholders to rewrite Colorado's asbestos in soil regulations as an advocate for our clients. We know what is and what is not required and how to move a project forward in a fair and responsible manner when regulated asbestos contaminated soil is encountered. LTE asbestos services include:

- Two-hour awareness training and certification programs
- Asbestos-containing soil assessment, management, abatement
- Asbestos-containing building materials assessment, management
- Abatement design plans
- Abatement oversight
- Air monitoring
- Certified asbestos building inspector demolition permit signoff

Asbestos-Containing Material Identification

Sampling & Abatement Oversight
