Attention to health and safety is essential for all projects, for all businesses, and in all industries. With two 1,000-day safety records achieved in the past six years, nobody knows that better than us. Our staff of highly trained safety professionals offers the ability to expand or supplement our client's internal staff to ensure a greater level of regulatory compliance and a safer employee workplace. LTE can provide the following services:

- Training and certification programs
- Health and safety plans
- Compliance auditing
- Construction safety oversight
- Contractor safety program education
- Occupational Safety and Health Administration-competent person, provisions for trenching, excavation, scaffolding, and hazardous materials
- Hazard identification, classification, and quantification
- Personal protective equipment evaluations
- Hazardous materials management
- Department of Transportation regulation assessment

Radon assessment and testing

Mold assessment and testing
