LTE administers all aspects of stormwater management for both industrial and construction discharges. From obtaining general or site-specific discharge permits, installing best management practice controls, monitoring discharges, to training site personnel, our goal is to ensure that our client's operations are not impacted by compliance or structural issues caused by stormwater.

- Legal support and research
- Discharge permitting for construction stormwater
- Discharge permitting for industrial process water, sanitary sewer, and stormwater
- National Pollutant Discharge Elimination System permitting and monitoring
- Stormwater Pollution Prevention Plan preparation, implementation, and training
- Stormwater inspections
- Stormwater Discharge Monitoring Reports
- Stormwater best management practices preparation and implementation
- Certified Erosion Control Plans
- Reclamation
