Our dedicated staff ensure compliance with regulations based on the current, but everchanging, regulatory environment. LTE staff's foresight and expertise paired with our team of scientists and engineers working across the United States provide air quality support and services resulting in satisfied and trusted relationships with clients, particularly in the oil and gas industry. LTE air quality services include:

- Air Pollution Emission Notices
- Air Quality Title V
- New Source Performance Standards applicability, implementation, and upkeep
- Construction and operating permits
- Greenhouse gas emissions reporting
- Regulatory applicability and analysis
- Compliance audits
- Process and control equipment evaluations
- Regulatory negotiation and support
- Maximum Achievable Control Technologies applicability, implementation, and upkeep
- Air emission inventories
- Dispersion modeling
- Forward-looking infrared surveys

Air Pollution Emission Notice

Air Quality Title V
